

AMBUCS TM

Creating Mobility and Independence For People With Disabilities

- July 7**-Regular Club Meeting with Steve Warren from Texas Boys Ranch speaking
- July 12**-Basketball meeting at 50th Street Caboose at 11:45
- July 14**-Regular Club Meeting with committees to discuss tournament and website options
- July 18**-Board Meeting at 19th street Schlotsky's at 11:45
- July 20-23** - National Conference in Memphis

AT LAST WEEK'S MEETING... We had good attendance last week. The club covered a couple of basketball items, including getting a new website strictly for the basketball tournament. Membership was largely in favor of a new website that would do a better job of promoting our tournament and adding value to our visitors and sponsors. Our speaker was Danny Soliz from WorkForce Solutions. He talked about his previous jobs and how he ended up at Workforce Solutions.

Theme chosen because the club is considering starting a new website for our basketball tournament that will add value to our advertisers, fans and teams.

One possible designer for our new basketball website is Republic Design and their website is www.republicd.com

The New Tandy 2000
"Simply Incredible."

Meet the incredible new Tandy 2000 Personal Computer. A truly remarkable machine that you should get to know. Why? Because the Tandy 2000 offers more than other MS-DOS computers on the market. For instance, it's faster than the others. In other words, it's more powerful. It has more disk storage, and more detailed graphics. Reproduction isn't the easier. Even the HIM PC can't compare. With the Tandy 2000, you get to choose from the most popular and advanced MS-DOS software around. From word processing to electronic filing to spreadsheet. The beautiful, ergonomic design makes the Tandy 2000 a pleasure to look at and a breeze to use. And don't forget Radio Shack's extensive service network.

Ultra-high performance Tandy TDS-60 Model 2000 system starts at \$2299. Incredible? You bet!

Radio Shack COMPUTER CENTERS

From the Internet, so it has to be true: Despite what he may have claimed, Al Gore did not invent the Internet. The Internet was invented in the United States during the late 1950s to the 1970s by a group of researchers and scientists at the newly formed Advanced Research Projects Agency (ARPA) after the former Soviet Union launched Sputnik. Realizing that the United States had suffered a great technological blow by allowing the USSR to hold the first successful satellite launch, ARPA set out to create a brand new technology unlike anything that had ever been done before; and the Internet was the result of their hard work.

Officers

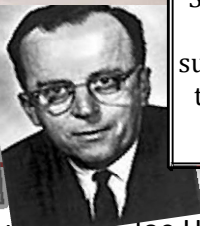

- Morry Martinez-President
- Missy Hopson-Vice President
- Leslye Geistmann-Secretary
- Joe Lunardon-Treasurer
- Bobby Drum-Project Manager
- Gary Light-Sergeant at Arms

Board Members

- Joe Hoelscher
- Josh Dill
- Randall Beasley
- Vic Bobo
- Adam Zepeda
- Karen Moeller
- Leslye Geistmann
- Gary Johnson
- Patti Kissko
- David Bloodworth

This guy (J.C.R. Licklider) helped invent the internet
